LD 1847

I'm writing in opposition of LD 1847. This is another disastrous bill that would devastate most of the medical cannabis industry. Lots of small family businesses will struggle to comply and could force hundreds to close. All the extra costs for testing, tracking, and extra regulation will be either passed on to the patients or absorbed by the caregiver, either way it's a lose-lose for the patient and grower. Testing for example. Many patients rely on the varieties we grow to help with a long list different ailments and conditions. Not everyone will respond the same way to a certain variety so it's important for growers to have the financial freedom to grow what their patients need, their patients deserve it.

Thank you for your time,  
Erik
