

Jennifer Prescott
First Robotics Team FRC 133
LD 1740

I want to support at STEM matching grant program. I live in a rural area and it's difficult to raise money for STEM programs because there are very few large businesses in my school district. The matching grant program would help our organization immensely. My 17 yr old son has loved working on robotics as part of a team for the First Robotics Team #133 at Bonny Eagle High School. In fact he will be graduating this June and attending SMCC in the Precision Manufacturing program. A direct result of this robotics experience.
