Hello, I am a small business owner in Lebanon, Maine. This bill would put me and many other small businesses out of operation. We would be forced to change everything we have worked so hard for. These changes would raise costs, reduce access, and put small, local producers at risk—hurting both patients and the local economy. We've already seen what happens when local manufacturing disappears: product quality drops, prices go up, and community trust erodes. Why are we doing the same to cannabis?

The current system works. It gives patients safe, affordable access to medicine made by people we know and trust. Overregulating it in ways that benefit large corporations undermines everything that makes our program successful.

Please support sustainable, community-based cannabis by rejecting these harmful proposals.
