LD 104

PLEASE DO NOT PASS LD 104. I strongly oppose LD 104, it would be detrimental to established small medical growers who take the time and care and have established trust with patients. Small growers could not afford the required testing and I believe it is another attempt for big out fits often funded from away to crush the vital and trusted small growers that exist today. I am one of those. I grow organically grown cannabis as well as certified organic vegetables. Customers can and do trust me. Testing sounds like a great idea but it would be so easy for large grower to "game" the system, same as some organic farmers do. Please continue with the rules in place and allow customers to choose who to trust!
