

Mark Robie
Winslow
LD 1847

I strongly oppose LD 1847. This legislation would most likely put me out of business after three years of investment and hard work to get established. This market was established for small growers to meet the need of a small number of customers. Trust is established between the patient and the grower. Track and trace is designed to attempt to make large growers stay honest. As we all know, people who want to "work " the system (testing etc) they will. Thank you!
