

Andrew Davis  
Bangor  
LD 1847

As a business owner and medical patient, I urge the committee to vote OUGHT NOT TO PASS on LD 1847. By instituting a redundant trace system like Metrc, you are unfairly burdening small farmers with astronomical costs that will force them out of business. As a caregiver, I'm already required to get records of sales for 7 years in order to keep my license, so why should I be forced to pay even more money to have an outside party track it, especially when this system is constantly abused in other states.
