

Nicholas Fulton
Carmel
LD 104

Hello, my name is Nicholas Fulton, I'm a medical caregiver for the state of Maine based in Carmel. I got into the medical cannabis industry when my mother was diagnosed with brain cancer with a 30% survival rate, and I watched RSO save her life, she's been in remission for over 5 years now. Bill 104 would destroy the livelihoods and careers of small family-run caregiver businesses just like mine, and it would be a disservice to the state's patients and caregivers to allow it to pass. Testing has time and time again proven inconsistent and unreliable at best, doing nothing to protect our patients with as much room for error as current standards allow.

This is really a small business tax disguised as a safety measure. Adult-use cannabis has proven no safer from this over-regulation, and now of all times given the current political climate with John Hurd and Metcalf in general, the last thing we should be doing is giving him more power to potentially abuse. We must not pass 104 for the patients and caregivers of Maine alike.
