LD 1620 – Reform Mandatory Testing in Adult Use

I strongly support LD 1620. Mandatory batch testing has become a tool for punishing small operators, not protecting consumers. This bill moves Maine away from unscientific, blanket mandates that raise costs without improving safety. Reforming Adult Use helps shield the medical program from attack, preserves consumer choice, and supports small businesses that grow clean, sungrown cannabis. It's time to end regulations that protect monopolies, not patients.
