Kenduskeag  
LD 104

I think LD104 will kill the medical program. Testing has proved inconsistent and expensive for the small business owner. As a small business owner and craft grower I can not afford to batch test every strain of cannabis I grow while maintaining my business and keeping up with the always increasing financial requirements and responsibilities incurred by staying compliant. This will kill my business and increase the cost of medicine for patients. Focus should be more on illegal grows and the black market rather than how small businesses can be eliminated from the medical program via increases on cost. People can't afford this.
