in and out of the garden we grow; dsp 157  
LD 1847

I am opposed to this for many reasons, one large one has already been submitted into my opposition of ld 104. but my largest reason to oppose ld 1847 and the implamenting of system known as metrc is: it just doesn't work. it is circumvented is every state it is in. you will find metrc tracked cannabis from every big california brand (and every other metrc state) if you go to any legal or non-legal state in the country. it clearly isn't working if it's not keeping the product in the intended market. why should we pay for a broken system? they have had plenty of time to fix their business and have not which leads me to believe they are actively working to find loopholes to create a monopoly with their multistate operating system.
