Please with respect consider the medical patients who use this medicine to better themselves daily. These folks sick with terminal and non terminal illnesses should not be taxed and regulated to the point they are unable to afford to treat themselves. These bills are a direct initiative derived from greed and driven by recreational influences.

The state has clearly struggled with managing the Recreational guidelines set in place so perhaps they should fully understand and operate within guidelines of previous initiatives before launching a handful of more regulations aimed to tax the sick.

Again please with respect understand we are not growing Recreational cannabis we are medical marijuana.
