

James Lynch
BREWER
LD 1673

Please approve LD 1673, Maine is at the bottom of the barrel when we are compared economically to the rest of the nation. For years Maine's public policy has been about short term, self interested issues. As a result Maine has been viewing and voting on legislation and public policies in isolation without any overall plan, any information on the bigger picture, any research into implications and the long-range effects , or any overall goal or objective. This bill will at least allow us to evaluate the economic impact of legislation. Maine is dying on the vine and we need legislation that to moves us towards prosperity not driving our young people and business away.
