

Eliot Jordan
Otisfield
LD 1897

My name is Eliot Jordan and I am a resident of Otisfield, Maine. I am medical patient and have been a caregiver assistant, primarily for sungrown. Through this work and connection with the medicine being grown as nature intended (with the support of incredible, knowledgeable, passionate caregivers) I believe it is the most critical aspect of the medical program: to provide pure, sun grown medicine. I hope that this action is clear, there is immense support to see outdoor cultivation of cannabis supported through the passage of LD1897. I believe it is paramount that patients have more access to sun grown products and would like to see the steps taken to reduce energy use in the cannabis industry. Thank you for your time and please vote and pass LD1897. The support of this bill is simple, which I am sure you have and will hear from many others as to why this bill means so much to the industry, patients, and growth practices.
