I am overwhelmed with the erosion of the rights of citizens in this country. The fact that we have transgendered people in our state which led to the withholding of funds from the federal government is outrageous. We need to protect ALL of our citizens. We need to accept our citizens for who they are. I have always felt Maine to be a welcoming state and have voted many times in elections for equal rights and non-discriminatory behavior. Please consider the mental wellness and safety of ALL of our citizens when voting.
