LD 233

I am writing in strong support of LD 233. Males should not be participating in women's sports, period. It does not matter how they "identify". The facts are these: no matter if men start taking cross-sex hormones, they are biologically stronger, faster and have greater heart and lung capacities than women. Men have been stealing opportunities from women and girls in athletics and it needs to stop. It shouldn't have happened in the first place.

Women also need private spaces (as do men). Men should not be allowed in women's locker rooms, bathrooms or especially rape crisis/abuse centers!

When did we as a society become so insane as to think this was a good idea. Please pass LD233. The insanity needs to end and we need to get back to the truth. And women need to have their rights respected.
