RE: Support LD 1882 to Help Better Protect Vernal Pools

As someone who cares deeply about Maine's environment, wildlife, and the health of our ecosystems, I urge you to support LD 1882 in order to help better protect state-recognized Significant Vernal Pools.

Vernal pools provide important breeding habitat for select amphibians, insects, spiders, and crustaceans. These habitats are typically small, temporary wetlands often less than one acre. Even though vernal pools may only fill with water for a short time in spring and fall, and often dry out by mid-late summer, their ecological significance for wildlife plays a much larger role. Additionally, the terrestrial habitat surrounding a significant vernal pool is where amphibians spend more than 90% of their lifecycle.

As written, existing regulations do not adequately protect state-recognized Significant Vernal Pools nor do they protect the full suite of habitats that vernal pool wildlife require. We urge for your support of LD 1882 in order to help address rollbacks that were made to this habitat a decade ago by establishing a 100 ft. no-disturbance zone around these vernal pools and closing an existing loophole that allows development to encircle these vernal pools in some instances. **We urge all members of the Environment and Natural Resources Committee to support this important bill.**

Sincerely,
