LD 1704

I am writing in OPPOSITION to LD1704. Every restroom has private spaces and trans boys and trans girls are the MOST likely to seek out that private space. They are not in the rest room for any other reason than to use the facilities. The implications also are not well thought out because if a trans boy is very male appearing, he must use the girls room since that is his gender assigned at birth. Is a genital check the way this will be resolved? I hope this is not where we are headed.
