Please do not advance this legislation. It is unequivocally an act of bigotry against people that identify as Trans. This is not who we are as Americans and does not represent the kind of government or society we wish to be. When we look back on history, legislation such as this one will be marks against the human rights of all people that our constitution is supposed to protect. It is our duty as citizens to make our voices heard against the legalized discrimination against Trans youth. We must protect all of our children, no matter how they identify, and that includes Trans children.
