Windham
LD 1840

I strongly support LD 1840. This bill would allow my business to engage with more customers in a friendly way. The state does not like it when cannabis companies market in traditional media ways so it is important to provide situations where cannabis patients can come together and enjoy the same privilege's that a brewing event might be create by putting brands together that I wouldn't heard of, or never travelled to see them because Maine is a big state and it is hard to travel far away all the time.

The caregivers and dispensaries pay to hold a license produce and sell cannabis, there are no video cameras inside peoples home to dictate how much they grow or sell, so the State requires tracking of the patient log and that's all. It shouldn't restrict us from being creative and engaging with local venue spots to create events where registered patients from other states would even be excited to come and spend money on hotels, gas, food (lobster), and most likely beer. This is a win-win for all industries. Let the cannabis community help Maine grow our economy.

Thank you for your time.
