As a citizen of Maine I'm absolutely tired of our State legislatures and governor voting merely along party lines as dictated by Washington DC. I can remember a time when Democrats and Republicans voted on things fairly equally and things passed or failed and that it wasn't the attitude of today where "you better vote along with The Party or else". There is no common sense anymore and there is no pride in our citizens as our legislative people do their jobs but only for selfish or agenda-based reasons. This agenda of male versus female versus 50 other made up genders has got to stop! And our federal government has said it needs to stop. Biological males have absolutely no business in female sports, restrooms, locker rooms etc. Just because they want to change what they are doesn't mean the whole world needs to change the facts. Women's rights have come a very long way and now the Democratic Party seems to be destroying those rights and not protecting women and girls. It is my strong belief that the women and girls should merely stop showing up for events because then the sponsors who make lots of money on the event and the arenas would be losing a lot of money and that would solve the issue. But that only further hurts the girls and women in the sports who are doing this for growth, their right to participate, and for scholarships and for life experience. Why should they be denied their rights because a very few mentally ill persons want to ruin that for them? Stop this nonsense now and get back to common sense. Stop taking orders from "The Party" the same as they did in 1938 in a Country called Germany and start working for what the majority of common everyday working people in Maine want and believe. Ban biological men and boys from women and girls sports, locker rooms, and restrooms. Thank you for your time.
