Portland  
LD 1652

As a pediatric dentist, I strongly support the MaineCare Taskforce bill LD 1652 as it represents a critical step toward improving access to dental care for Maine's children. By offering a tax credit for MaineCare providers, increasing MaineCare reimbursement rates, and creating dedicated positions within MaineCare for the dental program, this legislation would help address longstanding challenges in provider participation and care coordination. These measures would strengthen the sustainability of dental practices serving vulnerable populations and ultimately improve oral health outcomes for children across the state.
