

Victoria Leavitt
Lincolntown
LD 233

Thank you for taking the time to take my testimony into consideration. My name is Victoria Leavitt from the town of Lincolntown. I am writing in opposition to this bill.

As a nurse for the state of Maine I have concern that a passing of this bill will endanger women across the board. Whether biologically born with female anatomy, or born of female spirit this bill calls in opportunity for harassment of the female spirit. Being forced into boxes of masculinity or feminism aids no one. One born of male or female anatomy should not be forced to act in certain ways or participate in life in specific ways. Mind/body/spirit. They are all separate but one human. How we choose to express ourselves as humans need not fit into boundaries just so that the few who have difficulty seeing humans on a spectrum are more comfortable. Let humans choose how they outwardly present themselves in peace and security.
