This bill removes equity and promotes discrimination, hate, and fear mongering. I was born in a way that my body produces male level testosterone, and female level estrogen. My estrogen fluctuate like a women's estrogen does, I have a cycle in which I get monthly cramping like pain accompanied with bleeding, I ovulate as well.

The doctors and specialists are baffled.

FYI my birth certificate says I am a male. Clearly god screwed up big time when making me.

To those who drafted and sponsored this bill. Why are you targeting people for the way they were born, and who are you going target next?
