

Thomas Moyer  
Kennebunk  
LD 233

The human body, not the mind, determines whether someone is male or female.  
As a psychologist I have treated many people whose mind distorted reality causing  
them great distress.

Male athletes are in general bigger, stronger, faster, more powerful.

Female only sports were created to allow females an opportunity to compete against  
other females and not be put in an unfair or unsafe situation with male athletes.

Please pass LD 233.
