This bill has to be the most ridiculous bill out of all the bills that are being heard during this time slot.

Before there were preferred names, IE when I was in school there was nicknames, and students and teachers using these nicknames were never a problem.

It is clear that drafter and sponsors of the bill has something mentally wrong with them to the point that they feel the need to disrupt and cause pain to people who are only trying to live a happy life.

Can you maybe draft a bill that gets the drafter and sponsors the mental health help they need, clearly the 48k they get is not enough to pay for these services .
