I am in support of males not being in female sporting events and locker rooms. I was a female student athlete in my high school in the 1970's playing in field hockey and basketball and I was the boys manager for baseball, football and basketball. So I know the differences between males and females in sports and it would have been so upsetting to me if I had to share a locker room with boys while I was getting changed into my uniform. Trans boys are not equal to girls. Trans boys don't get their periods and I know with girls who do menstruate, it affects the way they play, most times playing in constant stomach pain. It is NOT a level playing field. Girls want fair play, they want to play against other girls. Someone needs to tell Democrats that boys are not girls, so I guess I will be that person.
