

David Baker
Hancock
LD 233

The text of this bill opens so many loopholes to malevolently controlling an individual's healthcare decisions, that it is comical. The motivations for this bill are ridiculous--founded on misinformation and cowardice. The bill serves nobody, but it will restrict the freedom of Mainers to care for themselves and their community. The representatives who put this forward should be ashamed of themselves. I urge the legislature to vote no on LD380.
