

Lauren Connolly
Ashburnham, MA
LD 104

No, this bill is detrimental to my ability to access affordable and quality plant medicine by small growers who take incredible amounts of time and care to make sure that they are providing to their patients. These bills (LD104 and LD1847) will absolutely wipe out the quality, craft, and drive that makes Maine medical the amazing program that it is today, and this is coming from an out of state patient who makes a two hour drive just for the pure quality and care that these Maine medical providers all strive for. Please, this is devastating for consumers and small business owners alike.
