

Edward Bulger  
Rumford  
LD 868

I'm a 67 year old husband, father, and grandfather. After working 47 years in the local paper mill I recently retired. I had been a registered Democrat for over 40 years but they have gone way to far by promoting perversion under the guise of equality. The proper and humane approach would be to have medical facilities to cure sexual dysphoria not embrace it.

Males are naturally stronger than girls this starts out as babies and continues as they develop. I have been an athlete and a youth coach. I coached from t-ball up to youth football 3 through 6th grade. I have coached boys and girls. Males are stronger and faster even at younger ages. Males competing in girls sports creates an unfair advantage for males that is more than obvious. Allowing males to compete against girls is betrayal of the highest level for these female athletes who have been working on their skills some of them for years and when they have a victory if a lifetime achievement taken away from this type of betrayal how does that set with them the rest of their lives. Males who think they are girls need help restoring their manhood not being told it's ok for them to not just want to be a girl but to be a girl. That is a lie. Males and females suffering from sexual dysphoria must be treated for it not celebrated for it. This small percentage of people are hurting the morale fabric of this country. Stop this madness now. It has gotten out of hand and has to stop before more incidents like what happened at the Christian elementary school in Tennessee. This problem has gotten worse by the twisted ideology that it is normal. It is not normal and must be stopped through empathy and mental health care.

Thank you Edward Bulger
