

Thomas Martin  
Sanford Maine  
LD 104

My name is Thomas Martin, and I'm a patient in Maine's medical cannabis program. I rely on small, local caregivers for affordable, high-quality medicine tailored to my needs. LD 104 would make it nearly impossible for many of them to stay in business by forcing costly, redundant testing and METRC tracking requirements meant for large-scale operations.

When caregivers are forced to pay \$1,000 just to test a couple of pounds and products made from the same flower, they can't afford to keep offering the variety and quality patients depend on. Prices will go up, choices will shrink, and access will suffer.

Please protect patients like me by rejecting LD 104 and preserving Maine's caregiver-based medical program.

Thank you.
