LD 1928

Dear ENR committee: State Representatives and Senators, I am writing in support of LD1928. It is time we put conscience before convenience. In order to rid our waterways and landfills of plastic we must make inroads into the public and industries use of plastic whenever possible. The alternatives are easy on this one. As in other public washing areas, shampoo, conditioner, body soap and lotion can be dispensed from multiuse wall /shelf containers. If a lodger wants to go high end in their offered toiletry product, then that can be done in this way. The size of a single use product of this type is negatively impacting marine life and wildlife. We must move away from plastics for so many reasons. Thank you.
