I am in opposition to this bill. Not only will it cause increased violence and bullying toward transgender students (who have yet to be recorded causing any safety issues using their preferred bathrooms), it is fundamentally unenforceable without allowing school staff to perform highly invasive anatomy checks of students, since there is no record of a child's assigned sex in school records. This would lead to increased bullying of all students who do not appear very feminine or masculine, as well as traumatic invasions of privacy by adults.
