LD 1883

To members of the Health Coverage, Insurance, and Financial Services Committee:

We need a better system to insure that every person can get the health care they need, because health care should be a right, not a privilege. Universal health coverage, such as what LD 1883 proposes, is that better system. It has worked for decades in Europe and Canada. It can work here too.

The federal government is attempting to destroy health care that could cover everyone. It is up to the states to save it and improve it for its residents. Please support LD 1883.
