Whitefield
LD 1883

Dear Health Coverage, Insurance and Financial Services Committee Members,

One of the largest concerns for Mainers is health care. Today you have an opportunity to address this issue so all Mainers can begin to have much needed access to basic health care. While some luckier folks may have access through their workplace, many do not. I have never understood how we can claim to care about our citizens when so many do not have access to basic health care.

Today you will undoubtedly hear many stories of how people struggle from lack of access to health care. Please listen carefully to each story. Then imagine it's your family suffering and you hold the power to change that.

Please pass LD 1883 and bring much needed health care reform to Mainers. Every single one of us deserves health care.

Thank you,
Mary Dunn
