LD 1818

I urge you to pass Resolution 1818. Maine taxpayers are being crushed by the "out of control" spending from the current administration. Maine is not attracting young people to our state, we are driving them away due to our excessive cost of living. Also, as one of the "grayest" states in the country, we are certainly not taking care of our senior community who struggle to pay their property taxes and in some cases have left their life long homes. The current insensitive politicians show by their actions that they do not care about Mainers suffering and have not proposed anything to alleviate it. So much for the motto "The Way Life Should Be" it's become "The Way Life OUGHT Not To Be"
