

Kelly Farrar  
Lewiston  
LD 1883

Good afternoon to all.

I am submitting this testimony to you today in support of LD 1883. Like many others, my biggest worry is paying my healthcare. We in America live in an extremely unique situation where we are constantly in fear of the next hospital bill. The rest of the developed world seems to have figured out how to avoid this stress because healthcare is a basic human need. Given the state of D.C., we cannot rely on the federal government to fix this. So, it falls to the states to figure out a way forward, to start fixing this terrible wrong. LD 1883 would go a long way to fixing this. We here in Maine can once again lead the nation and show the rest how things are done. Let's do right by our neighbors and get everyone taken care of.
