

Elizabeth Matheson  
Cape Elizabeth  
LD 1883

I would like to voice my support for LD 1883 - healthcare is a human right and something we will all need at some point, if not multiple, points in our life. If there is one thing we can almost all say for certain, it is that the majority of us are all one horrible car accident or rare diagnosis away from total financial ruin for generations.

At some point, our teeth and eyes were determined to not fall under our health insurance, so private insurers took them out of basic coverage. At what point exactly did my vision and dental health care become not as important as my heart health, my bone health, or my digestive health.

I support expanding access to quality healthcare for all Mainers - regardless of income, ability to pay, or ability to work. It is a human right.
