

Molly Mulhern
Camden
LD 1967

The towns of Rockport and Camden are setting up Energy Coach programs for our residents. This is a daunting task but one we believe necessary, especially for those struggling with older, leaky homes. For others the cost of energy is a burden. We believe helping all residents improve their heating and cooling, while encouraging non-fossil fuel energy will benefit both the planet and our residents. The program will greatly benefit from the help of the state's wide-area expertise and programming help. I am the founder of a grass-roots climate group--CamdenCAN(Climate Action Now) and we fully endorse LD 1967. Thank you for your attention to these thoughts.
