

Sue Stableford
Brunswick
LD 1971

I support LD 1971. We need to protect our immigrants from unwanted and unwarranted legal interference from federal immigration personnel. My community has many immigrant families and they should not live in fear for themselves or their children. ICE has no place trying to detain new Mainers and causing parents to fear sending children to school, seeking food at our local food bank, getting health care, or moving freely about. We have seen what happens when ICE was given "free reign" to arrest and detain people in other places, and we don't this in our state.
