I am a resident in Wells, ME. My concern over the Wells Police entering into a contract with ICE for training is that ICE has been shown to operate outside the law far too often per recent court cases. Who will provide the training from ICE and how can we trust that training to follow the actual laws and our Constitution? Too many top officials of this administration have publicly stated their refusal to allow due process and too often they have been shown to have detained those here legally with cases in progress or those that are citizens. How can we trust the training from the agency acting outside the law now without review by a immigration law expert?
