

Melissa Berky
Bangor
LD 1930

My name is Melissa Berky and I live in Bangor, ME. I am opposed to LD 1930. I am a retired Certified Nurse-Midwife who provided women's health services to women of all ages for many years in the Bangor area. There is no legal reason to redefine an embryo or a fetus as an unborn child. This is a political attempt to regulate women's physical and mental health by giving separate rights to the embryo or fetus. And it's a backhanded way to regulate health care providers who provide services to pregnant women. Life begins at birth which I have witnessed many times! The first breath, the cutting of the cord, and now you have a child for the first time. Please do not pass LD 1930.
