LD 1674

I STRONGLY URGE you to vote OUGHT NOT TO PASS on LD 1674, An Act to Require Insurers to Address Climate Risk in Their Business Activities. This is one of the most ridiculous pieces of legislation I have seen this year! Are you serious?!?! First of all, climate is always changing, has always changed, and will continue to change. By definition, climate is the prevailing conditions or general conditions in an area or region over a long period. In other words, ever changing and evolving, like the earth, and people, and animals, and the cosmos! NOTHING EVE STAYS THE SAME. Ask anyone over 60 or 70. Your world, your body, your car, your children, EVERYTHING changes. That is what climate is all about. The weather changes and it is called CLIMATE! It is arrogant of mankind to think they can have anything to do with the changing weather or climate. It has changed many, many times since the earth was formed and will change many more times. Is it always for the better? Well ask the dinosaurs what they think. Long and short of it, to ask the insurance companies to come up with an insurance plan that covers all the things that could maybe someday kind of happen and you won't be able to pay the premium. Then what? We don't get insurance. That's not going to be very good for anyone! This is just climate change hysteria to make us all drive electric cars that keep us from living our lives, filled with finding charging stations everywhere so we can never see our loved ones who live far away. Just calm down and realize that climate has, is and will always change. Sometimes for the better and sometimes not. It isn't up to us but a more SUPREME BEING! Thank you for your thoughtfulness and voting OUGHT NOT TO PASS on LD1674. Also, Thank you for your service to our state!
