I strongly oppose the use of local or state police resources to further the aims of ICE or the Border Patrol. It is a federal function, not a state function, and should be financed and manned by the federal government. State and local government are stretched thin enough. I also feel that these offices have been violating the basic rights of undocumented workers, e.g. but not limited to, the lack of due process, defiance of judicial decisions, the indiscriminate jailing of folks, including those legally here and the implicit racism of the entire endeavour
