LD 1883

I oppose LD 1883 "An Act to Enact the All Maine Health Act."

This bill proposes a sweeping government-run health care system that would upend Maine's health care marketplace, put immense financial pressure on the state's taxpayers, and reduce patient choice and quality of care. While well-intentioned, this proposal is modeled on ideas that have failed in other states and ignores practical, sustainable, and market-oriented reforms that would truly improve health care access and affordability in Maine.

I oppose LD 1883 and it "ought not to pass."
