LD 1378

I support LD 1378! We must keep guns out of the hands of individuals who pose a lethal risk to themselves and others. How many massacres around the US will it take before WE TAKE ACTION? We have now had the Lewiston massacre right here in our backyard. Now will we take action? What about my right to live without the constant ever-present fear of dying in a shooting? At the school where I work. In a theater. In my church. At the grocery store. I was sitting in church last Sunday wondering "when did I start thinking about the possibility of an active shooter in church?" When I was a young adult, that thought never crossed my mind. I never go into a public venue especially a large gathering of people without thinking about gun violence.

We need this law.
