

Susan Wright
Rockport
LD 1730

LD 1730 is a brilliant cost effective, ecologically sound and encouraging sign that technology exists to support the ongoing efforts to address climate change and provide individuals including renters the means to harness our natural resource of the Sun to:

Equitable Access: Low-cost systems (\$600-\$5,000 depending on system and battery size) are more affordable for low-to-moderate income households

- Lower Utility Bills: Systems offset grid use, reducing utility bills
- Energy Independence and Resilience: Provides emergency backup power during outages when paired with batteries
- Improved Public Health via Reduced Emissions: Widespread adoption could displace millions of metric tons of CO₂ annually

Please your strong consideration LD 1730 is a significant contribution
