

Kerryl "Lee" Clement
Lewiston
LD 555

The time for accountability has long since passed and LD555 addresses an issue that is an embarrassment to the State of Maine. Children are dying as a result of DHHS ineptitude.

The story surrounding the need for a separate entity to serve and protect children and families has been told for quite some time. The late Bill Diamond has urged us to "Walk a Mile in Their Shoes" yet the people's representatives seem not to care.

I won't waste your time repeating the same things you have heard before, I will, however, urge you to move the issue forward and start doing what you are elected and paid to do. The case histories and stories of the abuse and neglect are horrendous; why would you want to be complicit in allowing them to continue.
