Senator Mark Lawrence and Representative Melanie Sachs and members of the committee: I am a relatively new Maine resident having moved here in 2023. I am so impressed with the efforts by the legislature to help people have access to solar. This bill aligns with my beliefs because it provides access to more citizens in a variety of housing situations. This bill is a win because it provides opportunities for more residents to use solar and participate in helping provide more clean energy for the state of Maine.

It is my understanding that these plug in solar units will provide some relief in energy costs and not require assistance in the form of state or federal subsidies.

Thank you for your work on such a positive bill.

Cynthia Marten. South Portland
