Testimony in favor of LD 1730

Dear Sen Lawrence, Rep. Sachs and members of the Energy, Utilities, and Technology Committee

My name is Steve Eagles of Dresden Maine and I ask that you endorse this bill which will make local, renewable, solar electricity available to all Mainers. I am an involved Unitarian-Universalist and we believe that we humans must care for the health of our planet. We are fortunate to be able to install solar panels on our roof 15 years ago and it changed our relationship with electric power by making us aware of how much and when we used our electricity. It will take many small, local generating facilities to reach our climate goals and allowing more citizens to contribute electricity to the grid will be a major step in that direction.

Please let all Mainers find the benefit of generating your own power by voting for this simple change.
