LD 1730

I am writing in swwhole-hearted upport of plug-in balcony solar, LD 1730, sponsored by Nicole Grohiski, from the Committee of Energy, Utilities and Technology. I think plug-in solar would be wonderful for Maine. It's less expensive than rooftop solar and can be used wherever the sun shines close to people's houses. We need to do everything we can to reduce energy costs for Mainers.
